

# COMMERCIAL HEATING INCENTIVE APPLICATION

## ELIGIBILITY

- Energy efficient electric heating systems are available to commercial and agricultural retail customers who purchase and install new electric heating equipment.

## REQUIREMENTS AND CRITERIA

- The commercial electric heat program applies only to structures receiving electric service from the Cooperative.
- The electric heating equipment must be permanently installed.
- A rebate of \$100 per ton is available up to a maximum of 150 tons for commercial facilities installing a heat pump system, unless a contractual rate has been agreed upon and is lower than the electric heat rate.
- There is no special electric heat rate for large power accounts.
- The customer will pay the cost of the equipment for three-phase sub-metering for general service accounts.
- Equipment must be purchased and installed before an energy efficiency incentive is issued.
- The Cooperative will issue reimbursement via check. The program is valid through December 31 of the current year.

## How to Apply

1. Complete the following rebate application.
2. Attach proof of purchase for the electric heating equipment purchase which includes a sales receipt(s) or invoice(s) itemizing the new equipment and indicating the size, type, make, model, purchase date, efficiency and vendor.
3. Return completed application and supporting documentation to:
